This action is **FINAL**.

Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11; 453 O.G. 213.

A shortened statutory period for response to this action is set to expire one month(s), or thirty days, whichever is longer, from the mailing date of this communication. Failure to respond within the period for response will cause the application to become abandoned. (35 U.S.C. § 133). Extensions of time may be obtained under the provisions of 37 CFR 1.136(a).

Disposition of Claims

Claim(s) 1-15, 25-28, 34, and 54-61 is/are pending in the application.

Of the above, claim(s) _____ is/are withdrawn from consideration.

Claim(s) _____ is/are allowed.

Claim(s) _____ is/are rejected.

Claim(s) _____ is/are objected to.

Claims 1-15, 25-28, 34, and 54-61 are subject to restriction or election requirement.

Application Papers

See the attached Notice of Draftsperson's Patent Drawing Review, PTO-948.

The drawing(s) filed on _____ is/are objected to by the Examiner.

The proposed drawing correction, filed on _____ is approved disapproved.

The specification is objected to by the Examiner.

The oath or declaration is objected to by the Examiner.

DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-5, and 54-59, drawn to mapping a texture onto a surface, classified in class 345, subclass 430.
 - II. Claims 6-7, 25-26,²⁰ drawn to specular reflected light, classified in class 345, subclass 426.
 - III. Claims 8-12, 27-28, 61, drawn to detail map, classified in class 345, subclass 430.
 - IV. Claims 13-14, 62, drawn to linking texture maps, classified in class 345, subclass 430.
 - V. Claims 15, 34, drawn to prefiltering video image, classified in class 382, subclass 260.

2. Inventions Group IV-V and Group I-III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because they have different modes of operation, different functions, or different effects. The subcombination has separate utility such as Invention I relates mapping texture onto the

Art Unit: 2772

surface of an object by obtaining color values from mipmaps and averaging the values. Invention II relates modifying reflectance light intensity, which does not relate to texture mapping and obtaining color value from mipmaps using marching technique of invention I. Invention III discloses generating a detail map by assigning pointers to the offset maps and interpolating the color using the detail map. This does not require other subcombinations to obtain texture value using marching technique and adjusting reflectance light intensity. Invention IV relates linking several kind of maps such as texture map, environment map, etc.,. Invention V relates prefiltering video images to generate mipmap and fasten rendering process. Each group does not require other groups to be patentable.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. Claims 6 and 25 link(s) inventions I and II. The restriction requirement between the linked inventions is subject to the nonallowance of the linking claim(s), claims 6, 25. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the

Art Unit: 2772

allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
